

Backend Developer Job Description

Office: Herzliya Pituach, Israel

Join a fast growing and dynamic Health Tech company that's improving patients' lives in developed and emerging economies

Diagnostics AI is passionate about making the world a better place by applying innovative AI to disease testing. We are looking for an expert Python developer with SQL and node.js experience, to carry forward our backend with determination, technical flair and strong communication skills. Perks include a fantastic learning opportunity, our resident chef, good train links (Herzliya Pituach), a great office rooftop balcony and our Options scheme. Join us and work for a company that is transforming healthcare.

Responsibilities

- Develop and maintain a secure and regulated medical application.
- Develop and maintain our Python based backend running on AWS.
- Manage SQL queries and data transport.
- Solve scalability problems and address security concerns.

Job requirements

- Strong Python
- Strong Node.js
- Mastery of MySQL or other relational databases.
- Knowledge of system and IP networking on the Linux environment.
- Fluent English.

Preferred

- Docker
- AWS Cloud formation
- Kubernetes
- VUE.js

How to apply

Send a cover letter and CV (in English) to jobs@diagnostics.ai, the cover letter referring specifically to the above job requirements.
